DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No 6,598,162 B1 to Moskowitz.

3. In regards to claims 1-6, Moskowitz discloses the random key includes one or more random or pseudo-random series of bits (Moskowitz: column 5, lines 40-47). This meets the limitation of “a random number generator to generate scramble key information.” Moskowitz also discloses the random key that is generated is also the descrambler of the previously scrambled signal’s format for playback and viewing (Moskowitz: column 6, lines 52-58). This meets the limitation of “a watermark generator to generate a watermark signal including the scramble key information concerning a previous video picture.” Moskowitz discloses the content can be encoded and scrambled after the data is watermarked (Moskowitz: column 6, lines 3-16). This meets the limitation of “an encoder to encode the multiplexed signal to output encoded video data; and a scrambler to scramble the encoded video data to generate scrambled video data.”
